M.S. Data Science graduate with a B.A. in Economics and 3 years of project management experience. Uses SQL, Power BI, Python, and statistical analysis to build dashboards and decision-support tools from multi-source data.

EDUCATION

Drew University — M.S. Data Science, GPA 3.93 — Madison, NJ | Aug 2026
Asian University for Women — B.A. Economics, CGPA 3.63 — Chittagong, Bangladesh | May 2016
Minor: Mathematics & Asian Studies | 95% Scholarship Recipient

PROJECTS

New York Emergency Department Demand Analytics — May 2026 - Oct 2026

- Built an Oracle SQL pipeline integrating SPARCS ED, Census ACS, weather, and geographic data into a 1,536-row county-quarter dataset covering 57 New York counties (2018–2024), with validated joins, lags, and QoQ/YoY metrics.
- Developed a Power BI dashboard for statewide and county trends, ED per 100K, regional comparisons, demographic and weather context, and counties with rising demand.
- Benchmarked four forecasting methods in Python; previous-quarter persistence achieved 3.36% WAPE on the 2024 holdout, supporting a lower-complexity approach for short-term planning; deployed a Flask app for county-level analysis and forecasts. | Project

TMDB Movie Recommender — Aug 2026

- Analyzed metadata for 5,000 TMDB movies and built a TF-IDF/cosine-similarity recommender using genres, keywords, directors, cast, descriptions, and audience activity.
- Evaluated recommendation relevance across 100 seed movies and deployed a Streamlit app with search, similarity scores, posters, and adjustable results. | Project

EXPERIENCE

CosmicVision Company — Ho Chi Minh City, Vietnam | Mar 2021 - Jul 2024
Lookdev/Lighting Artist

- Produced client-ready visual assets in cross-functional production environments and trained new artists on Maya and production workflows; received Most Interesting Employee 2021.

BadClay Studio — Ho Chi Minh City, Vietnam | Feb 2018 - Mar 2021
Project Manager

- Coordinated ~25 artists across 4 teams and up to 4 concurrent projects, tracking schedules, resources, client requirements, and VND 150M–1.3B (~$6K–$55K) budgets.
- Achieved ~95% on-schedule delivery across 1–12 month projects by coordinating status updates, client feedback, and priorities across artists, supervisors, and clients.
- Managed post-production for an episode of Netflix's Sweet Home and received Best Producer 2020.

SKILLS

Data & BI: SQL | Excel (PivotTables, XLOOKUP/VLOOKUP) | Power BI (Power Query, DAX) | Tableau
Programming: Python | R | Pandas | NumPy | Scikit-learn | XGBoost
Analytics: Data Cleaning | EDA | KPI Reporting | Dashboard Development | Statistical Analysis | Forecasting
Tools: Oracle | MySQL | Git | GitHub | Jupyter Notebook | Flask | Streamlit
